Portfolio: <https://qasim-portfolio-bay.vercel.app/>

Profile

Full Stack Engineer with 9+ years of experience building scalable, cloud-ready web applications across fintech, SaaS, e-commerce, and government sectors. Experienced in React.js, Next.js, Node.js, NestJS, Python, cloud technologies, and modern DevOps practices. Proven track record of leading cross-functional teams, designing microservices, and delivering high-quality products in Agile environments.

Core Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Context API, Tailwind CSS, Formik, Responsive UI, Accessibility, Performance Optimization, Data Visualization

Backend: Node.js, NestJS, Express.js, Python, GraphQL, REST APIs, Microservices, API Gateways, Serverless Patterns

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Sequelize, Knex

Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFront, RDS), GCP, Azure, Docker, Docker Compose, Kubernetes (basic), CI/CD (GitHub Actions, GitLab CI, Azure DevOps), Monitoring & Logging, Infrastructure Automation

Additional Skills: AI/OCR Integrations (Regular, Aware, face & ID recognition), Payment Gateways (Payfort), Realtime Dashboards, Messaging/Notifications, Agile/Scrum, System Design, Performance Tuning.

Professional Experience

Senior Team Lead

Uqoud | Dubai (Remote) 2022 – Present

Architected full-stack solutions for a digital contract, e-signature, and eKYC platform using React.js, Next.js, Node.js, NestJS, and GCP. Integrated AI-based OCR/MRZ, facial recognition, and identity verification services. Designed microservices for document workflows, contract states, payments, and user management. Implemented CI/CD pipelines with GitHub Actions and Docker-based deployments. Led frontend, backend, and mobile teams ensuring cross-functional alignment and timely delivery. Optimized accessibility, SEO, and system performance across the platform.

Senior Software Engineer

Aion Digital | Remote 2019 – 2022

Built banking app modules including onboarding, card issuance, financing, and reporting using React.js and Node.js. Developed backend microservices in Node.js, NestJS, and Python deployed on Azure. Integrated national ID verification, payment systems, and communication services. Used PostgreSQL, MySQL, and Knex for enterprise-grade data operations. Collaborated with product, QA, and DevOps teams in Scrum-based workflows.

Senior Software Engineer

Virtual Force | Remote 2017 – 2019

Delivered API-driven solutions for healthcare and SaaS platforms. Developed dashboards, admin panels, and reusable UI components. Mentored junior developers and improved CI/CD reliability. Focused on performance tuning, caching, and API optimization.

Software Engineer

Tkxel | Lahore 2017

Built full-stack features for EvaluSkills using React.js, Node.js, PostgreSQL. Implemented RBAC, form flows, visual analytics, and automated deployments. Wrote unit tests (Jest, Mocha) and supported production releases.

Selected Projects

Uqoud – <https://platform.uqoud.com>

Tech Stack: React.js, Next.js, Node.js, NestJS, Python, GCP

- Developed scalable contract workflow systems with role-based, real-time access control.
- Integrated OCR and eKYC solutions for identity verification
- Designed scalable, serverless APIs for high availability

Cbuy (Business Marketplace Platform) – [Cbuy](#)

Tech Stack: Next.js, NestJS, PostgreSQL, PayPal

- Developed a platform for buying and selling businesses with advanced search and matching features
- Enabled users to create and publish company sale or purchase requirements
- Implemented structured company listings including turnover, location, and ownership details
- Integrated secure payment processing using PayPal for service charges
- Built a real-time messaging system connecting buyers, sellers, and industry experts

InsuranceMarket.ae

Tech Stack: Node.js, Python, NestJS, PostgreSQL, Redis, Docker, AWS

- Migrated core modules from a monolithic architecture to microservices
- Implemented Redis caching to optimise high-traffic APIs
- Automated CI/CD pipelines and improved infrastructure monitoring

Cryptoslam – <https://cryptoslam.io>

Tech Stack: React.js, Next.js, Node.js, NestJS, PostgreSQL, Tailwind CSS

- Built high-performance, real-time dashboards for large datasets
- Reduced API response and frontend rendering time by 30%

Eatzy (Food Delivery Platform) – [Eatzy](#)

Tech Stack: React.js, Redux, Redux-Saga

- Developed a multi-platform food delivery system for restaurants, customers, and riders
- Implemented restaurant management features including menu and order handling
- Built customer-facing ordering and real-time tracking functionality
- Supported delivery operations with mobile-based tracking
- Designed scalable backend services to handle high traffic

Education

BSIT

Punjab University, 2017
